PRODUCT: EVEREST

Overview

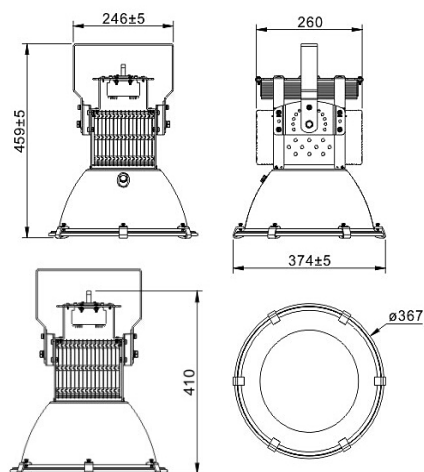

The EVEREST FLUX LED light is a resilient and tough high bay light which can withstand all environments where durability is key. It is designed with commercial applications in mind and is the perfect lighting solution for Factories, Warehouses, Shopping Centres or any other large indoor lighting applications.

The EVEREST FLUX LED has a closed corrosion-proof silicone ring to make it dust proof and waterproof, with a cool light source for anti-explosion safety; making it a perfect lighting option for sensitive environments like gas stations. It has a unique fixture for vibration resistance and a patented thermal management design to ensure excellent heat dissipation and long lifespan of LEDs.

The EVEREST FLUX LED fitting offers an incredibly bright, intensive and powerful light with changeable beam angle. This light will offer a robust flicker free solution whilst still reducing your energy consumption compared to non-LED lighting by up to 70%. The LED light has a 50,000 hour rated lifespan for a low maintenance solution for those hard to reach, high up area's.

Available wattage

500W
